PROFILE

Enthusiastic and self-driven third-year undergraduate specializing in Data Science at SLIIT, with a solid foundation in statistics, machine learning, and programming. Passionate about extracting meaningful insights from data and developing practical solutions to real-world problems. Skilled in tools and technologies such as Python, R, SQL, and data visualization libraries. Also experienced in software and web development using technologies like HTML, CSS, JavaScript, Java, and the MERN stack. Eager to leverage both analytical and development skills in dynamic environments to contribute effectively to innovative, data-driven projects.

EDUCATION

B.Sc (Hons) in Information Technology

June 2023 - Present

Sri Lanka Institute of Information Technology (SLIIT)

- Specialization in Data Science.
- Current GPA : 3.4
- Key Modules :

Introduction to programming / Object Oriented Concepts / Information System and Data Modeling / Internet and Web Technologies / Software Engineering / Object Oriented Programming / Database Management System / Computer Network / Operating Systems and System Administration/Mobile Application Development / Data Structures and Algorithms / Machine Learning and Optimization Methods / Information Retrieval and Web Analytics / Fundamentals of Data Mining / Massive Data Processing and Cloud Computing

GCE Advanced Level - Physical Science Stream

2021/2022

St. Anne's College, Kurunegala

- Subjects : Combined Mathematics, Physics, Chemistry [B, 2C's]

GCE Ordinary Level

2017

Sir John Kothalawala Central College

- Results : 9A's (including Mathematics, Science, English, Information & Communication Technology)
-

CERTIFICATES

Python for Beginners - University Of Moratuwa

SQL & Relational Databases

Cognitive Class (IBM Skill Network)

Data Science Methodology

Cognitive Class (IBM Skill Network)

Deep Learning Fundamentals

Cognitive Class (IBM Skill Network)

Prompt Engineering for Everyone

Cognitive Class (IBM Skill Network)

Microsoft Learn - Configure Virtual Networks

Microsoft

AWS SimuLearn: Networking Concepts

Amazon Web Services (AWS)

KEY SKILLS

• **Programming languages**

Python, Java, Java Script, C++, C, R, SQL

• **Frontend Development**

React, Html, Css, Type Script, Tailwind Css

• **Backend Development**

Node js, Express, Python, Java, PHP

• **Data Science**

pandas, numpy, machine learning, data visualization, deep learning

• **Other Tools**

GitHub, Figma, Postman, AWS, Azure, Power BI

• **Data Bases**

MySql , Mongo DB

SOFT SKILLS

- Critical thinking & Problem Solving
- Leadership & Teamwork
- Time management & Emotional intelligence
- Effective Communication & Adaptability
- Creativity & Work ethic

PROJECTS

Sustainable Marketing & Wastage Management System

A online buying and selling platform for farmers to sell their products and customers to buy fresh and good vegetables. And also customers can add reviews about their experiences. (MongoDB, Express js, React js, Node js, Tailwind Css, Postman)

GitHub Link - github.com/pasindu7828/Sustainable-Marketting-Wastage-Management-System.git

Online Tour Guide Management System

A online web application for local and foreign tourists can use to find their destinations to visit , book tour guides & vehicles and search destinations. (Java, MySQL, Html, Css, JavaScript, JSP)

GitHub Link - github.com/pasindu7828/Online-Tour-Guide-System.git

Finance Tracker mobile application

A mobile app for track monthly income, expences and set budget limits for budgets and show notifications when user reach the budget limits and use shared preferences.(Kotlin & Figma)

GitHub Link - github.com/pasindu7828/financetracker.git

Online Bus Tracking mobile application

A mobile app for bus passengers to find their root and what are the available buses at that moment, current location of the bus, book tickets with user friendly UI designs. (Kotlin & Figma)

GitHub - github.com/pasindu7828/Online_Bus_Tracking_App.git

Public Health Information AI System

Created a Python AI system that gives reliable public health information. Multiple AI agents worked together to answer questions, keep data safe, and show health data visually.

GitHub Link - <https://github.com/pasindu7828/Public-Health-Info-AI.git>

Auto Loan Default Prediction System

Built a Python ML system to predict if an auto loan applicant might default. The system uses financial data and past loan history to help make better loan approval decisions (pandas , numpy, streamlit)

GitHub Link - <https://github.com/pasindu7828/Auto-Loan-Default-Prediction-System.git>
